Reshaping the future

4th
Edition

EDU TECH

The International Fair and Forum for Technical and Vocational Education and dual System and training

Under The Auspices Of

19-20 February 2025

Royal Maxim Palace Kempinski

Education has been a national priority for Egypt over the past few years, and it continues to be an integral part of the government's development plan. Technical and Vocational Education and Training (TVET) is at the heart of the new education reform. The Ministry of Education's strategy is an innovative reform program aimed at transforming technical education and the development of the different sectors of TVET into one of the important axes of preparation for the Fourth Industrial Revolution and for the implementation of the sustainable development plan of Egypt.

EDU TECH
MAKING THE FUTURE

Vision and Key Pillars of Technical Education Transformation in Egypt

Pillar 1 - Improving the quality of technical education (the establishment of the Egyptian Authority for Quality Assurance and Accreditation in Technical and Technical Education and Vocational Training (ETQAAN) and the Quality Support Centre for Technical Education Schools (CEQAT)).

Pillar 2 - Transforming curricula into curricula based on the skills methodology + digitizing educational content and introducing blended learning systems (skills + competencies + digitalization).

Pillar 3 - Improving the skills of teachers through training and qualification (establishing an academy for technical education teachers 'TVETA').

Pillar 4 - Employer participation in the development of technical education) Applied technology schools, dual education schools, and sectoral skills councils.

Pillar 5 - Changing the stereotypical image of technical education.

The International Fair and Forum for Technical and Vocational Education and dual System and training

المنتدى و المعرض الدولي للتعليم الفني التكنولوجي و التعليم المزدوج و التدريب المهني

Under The auspices Of

Over the past three years, EDUGATE has successfully organized “EduTech “annual forums in 2022, 2023, and 2024. These events have supported the vision of political leaders, as well as efforts by the Ministries of Education, Technical Education, Higher Education, and Scientific Research. Together with educational institutions, the Federation of Egyptian Industries, and other stakeholders, EduTech has played a pivotal role in driving advancements in Egypt’s technical and vocational education landscape.

The event is composed of 6 components:

1. EduTech Forum:

The two-day forum will build on discussions from previous editions and review the implementation status of recommendations from prior years. Topics will cover progress in integrating technical education with industry, aligning education with labor market needs, external job opportunities, and improving the public perception of technical education.

The forum will be accompanied by an exhibition showcasing new higher education opportunities for technical education graduates. The exhibition will feature new applied technical schools established through partnerships with business leaders and international partners, with the number of institutions expanding each year.

EduTech will prioritize the private sector's role by inviting businesses to discuss opportunities and challenges in developing the technical and vocational education system.

New International Collaborations

This year, EduTech is honored to invite participation from technical and technological education institutions across the Arab region, including the Arab Organization for Agricultural Development, along with entities from Europe and the Arab world focusing on labor mobility and technical education.

EduTech Forum attendees:

- Honorable Ministers.
- Members of parliament and senators
- Writers, intellectuals, and public figures.
- Experts in technical education, higher education, and technology.
- Deans and heads of higher education institutions in which technical education graduates are enrolled
- Federation of Industries and Businessmen in the Fields of Industry: Agriculture, Tourism, Health, Real Estate Development, and Others
- Business partners of ATS Schools.
- International companies operating in Egypt and the MENA region
- International donors work in Egypt on projects aimed at developing and improving technical education.
- National institutions and NGOs that aim to achieve their social roles
- Chambers of Commerce

2. The Exhibition:

for two days Gathering all stakeholders in TVET under one roof allows students to explore different career pathways and opportunities within the TVET sector, interact with industry experts, educators, employers, and peers, and learn more about the expectations and requirements of the job. EduTech Fair provides a platform for stakeholders to share and exchange information to meet current industry standards and demands.

A.Exhibitors

- Applied Technology schools, Dual-system education, Centers of Competence, Training stations (PVTD), and Vocational training centers.
- Technological Universities
- International partners' projects and initiatives
- companies targeting TVET Graduates

B.Exhibition visitors:

- Students of preparatory Schools
- Students of TVET schools
- Parents
- Industry leaders
- TVET experts

3. Jobs and Career Paths:

The 4th edition of EduTech provides applied technology dual system education school graduates with the perfect platform where employers from various industries come together to showcase their companies and available positions. To give students chances to meet with recruiters, submit resumes, and even participate in on-the-spot interviews.

At EduTech, we understand that navigating through the vast array of career options can be overwhelming. That's why we provide comprehensive information on various career paths, including detailed descriptions of different industries, required qualifications, potential salary ranges, and growth opportunities. Whether they recently graduated or are considering a career change, our resources will help students make informed decisions about their professional journey.

EDU TECH
Building the Future

4. Interactive stage activities

Parallel with the fair and forum, student orientations and interactive activities will take place to raise visitors' awareness of TVET's advantages. Successful models will be presented. International partners applied schools, and technological universities will address the audience with engaging topics, helping them better understand how vital TVET is for the economic development of Egypt.

5. The innovators "startups":

A dynamic platform where young entrepreneurs can present their innovative startup ideas to potential business incubators and industry partners. This exciting component of EduTech encourages students to showcase their creativity, passion, and entrepreneurial spirit.

Participants will have the opportunity to receive valuable feedback, network with industry professionals, and explore collaboration opportunities that can help turn their visions into reality. Join us in empowering the next generation of innovators!

6. honoring TVET Graduates:

The ceremony will be held to honor and recognize the achievements of the top 20 ranked students. EDUGATE, the Ministry of Education and Technical Education, Partners, and Sponsors presented appreciation certificates along with various gifts and financial rewards.
